

Colour reference

Every colour used in the Taaran Jain portfolio, generated from source. Design tokens flip with the theme and should be preferred; palette colours are Tailwind utilities used directly in components.

Slate carries all text and structure. Light and dark use different steps to hold contrast.

Fixed colours

These do not follow the theme and must not be tokenised.

COLOUR	VALUE	WHY
WhatsApp green	#25D366	Brand-locked. The WhatsApp FAB must use the official colour.
Email indigo	#4f46e5	Hard-coded in the contact email template — mail clients cannot read CSS variables.
OG gradient	#818cf8 -> #7c3aed	Open Graph card headline gradient (indigo-400 to violet-600).
