Jaipur, Rajasthan

AI Engineer with 1+ year building production LLM systems — RAG pipelines, agentic workflows, and automation backends using LangChain, FastAPI, and n8n. Shipped systems that cut manual processing time by 80% and improved response accuracy in client-facing deployments.

TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, NextJS, REST APIs, n8n, LangChain, LangGraph

ML / DL & AI Libraries: Pandas, NumPy, Scikit-Learn, TensorFlow, Keras, Hugging Face Transformers

AI & Data Specializations: LLMs, Prompt Engineering, RAG, Agentic AI, Multi-Agent Systems, Anomaly Detection, NLP

Data Tools & Cloud: PostgreSQL, MySQL, MongoDB, Supabase, ChromaDB, FAISS, Firebase, GCP, AWS, Docker

PROFESSIONAL EXPERIENCE

Jun 2025 – Present
Jaipur, Rajasthan

AI Engineer, *e-Marketing.io*

- **AI Engineer** owning end-to-end design and delivery of the **full AI product suite** — from problem scoping and model selection to deployment and iteration across agency and client workflows.
- Built production AI systems including a **Meeting Summarizer**, **Keyword Analysis Engine**, and **lead-qualifying chatbots** across social and messaging platforms — keeping client pipelines **active 24/7**.
- Shipped a **WhatsApp Task Delegation system** and **Lead Management Dashboard** using **FastAPI, React, and PostgreSQL** — eliminating manual overhead and giving clients **real-time pipeline visibility**.

Dec 2024 – Jun 2025
Bengaluru, Karnataka

Data Science Intern, *LogiScope Pvt. Ltd.*

- Designed and deployed **DBSCAN and Autoencoder-based anomaly detection models** on large-scale system log data — flagging irregularities in real time and reducing issue identification time by **20%**.
- Built a modular **FastAPI pipeline** for real-time log ingestion, preprocessing, model inference, and automated alerting — integrated directly with production monitoring systems.

PROJECTS

Nexus AI, *LangGraph, LangChain, Groq, Supabase, Next.js*

- Solved the **context fragmentation problem** in AI assistants by building a multi-agent system using LangGraph that unifies RAG, live web search, and persistent memory — eliminating the need to repeat context across sessions.
- Engineered a **sub-second streaming chat interface** on Next.js with Supabase-backed vector memory, giving users a chatbot that knows what it searched, what it retrieved, and what was said before — all in one coherent response.

One-to-Many Automation, *WhatsApp Business API, Supabase, TypeScript*

- Built a **WhatsApp bulk messaging platform** with campaign scheduling, multi-session support, and real-time delivery tracking — handling lead outreach at scale without manual intervention.
- Engineered a **lead management system** with pipeline visibility, contact segmentation, and campaign analytics — giving teams a full operational view in one dashboard.

MLInsights, *FastAPI, Scikit-learn, Python, TypeScript, TailwindCSS*

- Built a **browser-based ML platform** that takes any dataset from raw upload to trained model — covering EDA, data cleaning, and training across **30+ Scikit-learn models** with one-click comparison.
- Generated **automated PDF reports** summarizing model performance, feature importance, and dataset insights — eliminating manual reporting overhead for data teams.

CERTIFICATIONS

WorldQuant Challenge — Silver Certificate — Jun 2025

MLOps Specialization DeepLearning.AI (Coursera) — March 2024

TensorFlow Developer Specialization — DeepLearning.AI (Coursera) — Feb 2024

Machine Learning Specialization — DeepLearning.AI (Coursera) — June 2023

EDUCATION

Nov 2021 – Jun 2025

B.Tech - Artificial Intelligence and Data Science, *Poornima Institute of Engineering & Technology*
CGPA: 8.5

LEADERSHIP POSITIONS

Sep 2023 – Aug 2024

AI/ML Lead, *GDSC Poornima*
Led a team of 20+ members, organising 6+ technical workshops and hands-on AI/ML sessions to upskill the student community.

Dec 2021 – Jul 2023

Student Ambassador, *AICTE IDEA Lab*
Coordinated innovation lab activities and student initiatives under the AICTE national programme, supporting project development and interdisciplinary collaboration.

Nov 2022 – Mar 2023

Event Lead, *Poornima Hackathon 2.0*
Spearheaded end-to-end planning and execution of a 200+ participant hackathon, coordinating cross-functional teams across logistics, judging, and operations.
